

Quests

Given the **15 US cities** listed below, **starting from Los Angeles, CA and ending in Charlotte, NC**, use Google Maps driving directions to spell the word “DUST” in **exactly 17 contiguous moves**.

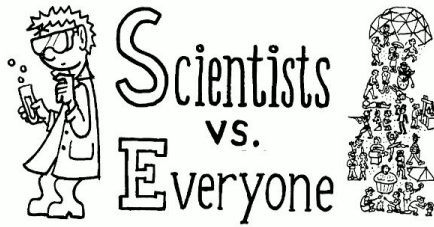

The **single keyword** answer to this quest is a **string of 18 characters** (lower-case, no spaces) composed of the first letter of each city, in the specific order* necessary to get from LA to Charlotte in exactly 17 moves.

(Rules: The definition of a “move” is by connecting City A to City B via a driving route on Google Maps. You can back track along the same path from whence you came from one city to another (e.g., from City A to City B and back to City A along the same route), which would count as an additional move. The letters “D-U-S-T” should be spelled as upper-case letters. Use Google Maps driving directions only. Do not manually drag-and-drop edit the driving directions to alter the route.)

For example: Starting in Nashville, TN and ending in Tallahassee, FL, connect Nashville, TN; Atlanta, GA; Greensboro, NC; and Tallahassee, FL in exactly 4 moves. In this instance, the single keyword would be: **nagat**
